

Best position for duplication

Auto Scan RF Multi Frequency Universal Remote Control Duplicator Feature

Auto scan type

Multi frequency 280-868mhz

Duplicate rolling code and fixed code Up to 4 different remotes in 1

Programming

A) Standard

1. Press and hold button 1 and press button 2 four times at same time
2. Release 2 buttons till LED flashed once every three seconds
3. Put original remote in the front of new remote (about 2-3cm), press the original remote button which need to be copied until the LED of new remote flash quickly (LED have regular flashes)
4. Press the button of New remote that you want to use to save the code
5. If you do not copy successfully, please repeat above steps
6. To duplicate a second button, repeat the above steps

B) Automatic matching code

After copy successfully, don't use any remote first, then put the new remote close to the receiver to active it, press and hold the button until the Led of it flash quickly, then you can try it

Emitting seed code

Pressing the button 1 and button 2 at the same time until LED flashes quickly. Release 2 buttons, press the button that you want to emit seed code, it has emitted seed code successfully

AMC: Automatic Matching Code

BFT

- 1) Press and hold button 1 and press button 2 four times at same time, Release 2 buttons till LED flashed once every three seconds
- 2) Put original remote in the front of new remote (about 2-3cm), press and hold the original remote button which need to be copied until the LED will turn on with a fixed light and then emits a double flash very 2 seconds
- 3) Pressing the hidden button or the button 1 and 2 simultaneously in the new models (transmit the seed code of original BFT remote) 4) Now the led will flash quickly, press the new remote button that you want to save the code, the LED will off 5) Now active the remote with AMC procedure

FAAC and GENIUS

Note: your original remote control must be in a master version

How to recognise a master/slave transmitter:

master: if you press any key of a master transmitter, the LED flashes before becoming steady.

slave: if you press any key of a slave transmitter, the LED goes on immediately with steady light

- 1) Press and hold button 1 and press button 2 four times at same time, Release 2 buttons till LED flashed once every three seconds
 - 2) Put original remote in the front of new remote (about 2-3cm), press and hold the original remote button which need to be copied until the LED will turn on with a fixed light and then emits a double flash very 2 seconds
 - 3) Pressing and hold the button 2 and 3 simultaneously of original FAAC/GENIUS to transmit the seed code
- 4) While the led of FAAC and GENIUS is flashing, put it close to new remote about 2-3cm, and press the button that you want to copy until the LED will change the frequency of flash (faster than before to confirm the correct copy the code)

V2

- 1) Press and hold button 1 and press button 2 four times at same time, Release 2 buttons till LED flashed once every three seconds
- 2) Put original remote in the front of new remote (about 2-3cm), press and hold the original remote button which need to be copied until the LED will turn on with a fixed light and then emits a double flash very 2 seconds
- 3) Press and hold once again the same button of original remote, the LED of new remote will flashes quickly, press the button that you want to save the code, until the LED off
- 4) Now active the remote with AMC procedure
